

Dijkstra's algorithm:  
(shortest path).

step 1:- make source node 0 (S) & all other ( $\infty$ ) infinity.

S	A	B	C	D	E
0	$\infty$	$\infty$	$\infty$	$\infty$	$\infty$

S is completed 0-0.

step 2:- Starts from source and check with least weights. A is least.  $A = 6 < \infty$

S	A	B	C	D	E
0	6	$\infty$	$\infty$	8	7

Step 3:- Now from S, A done check next by  $SA \rightarrow B$   
 $6 + 9 = 15$ . Now  $B = 15 < \infty$

S	A	B	C	D	E
0	6	15	$\infty$	8	7

Step 4:- Next small node. ( $E = 7$ ).  $CE \rightarrow E$  is,  
 $5 + 7 = 12$ . and  $DE \rightarrow E$  is,  $10 + 7 = 17$ .

~~Step 5:-~~

S	A	B	C	D	E
0	6	15	12	8	7

step 5:-  $CD = 8 + 3 = 11$  update C with 11.

S	A	B	C	D	E
0	6	15	11	8	7

~~2. B is next~~

The shortest distance from S is.

path

$S \rightarrow 0 \rightarrow S$

$A \rightarrow 6 \rightarrow S \rightarrow A$

$B \rightarrow 15 \rightarrow S \rightarrow A \rightarrow B$

$C \rightarrow 11 \rightarrow S \rightarrow D \rightarrow C$

$D \rightarrow 8 \rightarrow S \rightarrow D$

$E \rightarrow 7 \rightarrow S \rightarrow E$
